Since that time, the Service Authority has been monitoring 24/7 all sewage by-pass pumping systems. Staff requested that the Board of Directors add an extra $500,000 to the FY 2013 – FY 2017 Capital Improvements Program (CIP) to cover the cost of monitoring the sewage by-pass pumping systems on the multiple projects currently under contract and being constructed. Mr. Weber advised that presently there are four projects which involve the by-pass pumping: Bull Run Interceptor; Cow Branch Interceptor; Town of Occoquan Sewage Lift Station and Dumfries Lift station.

Mr. Grubbs moved that the Prince William County Service Authority Board of Directors does hereby approve the estimated cost of $500,000 as an addition to the already approved FY 2013 – FY 2017 Capital Improvements Program (CIP) to provide full time monitoring of sewage by-pass pumping systems and authorizes the General Manager to release these funds as needed for current projects under contract to cover the additional costs.

Second:  
Mrs. Eagles

A discussion followed on how the $500,000 would be divided among the four projects, approved subcontractors, adding the cost of monitoring the sewage by-pass pumping systems to the current contracts through a change order, working with the Virginia Association of Municipal Wastewater Agencies (VAMWA) and the Virginia Water and Waste Authorities Association in an effort to clarify DEQ’s new regulatory interpretation, who is responsible for providing the monitoring of the by-pass pumping service, future standby contracts, an explicit description of the term qualified personnel, the financial impact of the by-pass pumping monitoring 24/7 on each contract, and using the Supervisory Control and Data Acquisition system (SCADA) to address the issue.
