Second: Mr. Gonzales

Questions and answers followed, including discussion of the timeline for this project, the feedback process to managers, and project deliverables. Mr. Dickey added that there will be a continuous cycle of review across the organization, and that the Service Authority would receive sof:ware as a
deliverable. Additional discussion was held concerning quality assurance (QA) of data and involvement of the consultant in the future. Mr. Gonzales asked if the data will be provided manually or automatically and what is the QA process on the data that will be provided. Mr. Dickey responded that data will be provided automatically and the Authority, with the consultants’ assistance, will develop the QA methodology that will be tested on 15 different projects. Staff will provide periodic updates throughout the project. (Mr. Dickey advised the delivered product is a methodology that includes the levels of service and data analysis, all of which are documented and entered into a computer software program.) Mr. Dickey said Hawksley Consulting will be available throughout the project as needed, and can also assist with risk planning later if we request that service.

b) **Approval of Agreement between Prince William County Service Authority and Prince William County for Betterment of Water Facilities on the Minnieville Road Route 640 Widen to Four Lanes Project**

Mr. Dickey asked Board Members to approve the Resolution as provided. He explained that the reason for the thirty-five percent (35%) contingency is that the project has not yet been bid. With this amount of contingency, the General Manager should not have to come back to the Board for additional approval.

Motion : Mr. Ruecker moved that the Prince William County Service Authority Board of Directors hereby approves the Agreement between Prince William County and the Service Authority for Betterment of Water Facilities on the Minnieville Road Route 640 Widen to Four Lanes Project and authorizes the General Manager to execute the Agreement for Prince William County Project 0640-076-R98. Approval of the Board will be required if the lowest actual bid exceeds the authorization.

Second : Dr. Kooyoomjian

Discussion was held concerning potential residential connections during this project. Mr. Dickey stated the SA portion is only the water line itself. To a question concerning trails, Mr. Dickey replied that the SA has to dig up the trail to make repairs.

5. GENERAL MANAGER’S REPORT

a) Mr. Dickey presented Board Members a map of all Service Authority (SA) tanks to show which tanks have SA logos and which tanks may not need to have logos on them if they are not prominently placed in the County. Mr. Pannell recommended only five tanks continue to have logos because, while the painted logos will last up to 20 years, the SA logo itself sometimes changes. Discussion was held. Mr. Gonzales suggested there be logos on more tanks to make the logo (and SA name) more prominent. In response to a question, Mr. Pannell estimated it costs $15,000 to add the logo to a tank. Mr. Dickey proposed that, without Board objection, staff will seek the Board’s approval about whether to put a logo on each individual tank as it is scheduled for rehabilitation. The Board had no objection to Mr. Dickey’s proposal. The Board also had no objection to staff offering (and allowing) Prince William County to sponsor a message on the Potomac Mills tank.

b) Staff showed a brief video of the Occoquan Forest lift station coming online. Mr. Beidas provided a final update on the Occoquan Forest improvements. A few minor punch list items are almost complete. Staff has been working with VDOT to schedule a final inspection and estimates it will be completed within 30 days. The lift station was substantially completed March 1; it was placed into service and flows began on March 3. The old wastewater treatment plant is no longer in service. Mr. Beidas projects final completion by the contractor on March 18.

c) Mr. Dickey advised Board Members that the Authority has an agreement with Prince William County to turn over the Davis Ford Road well sites to the Occoquan Forest Owners’ Association when the sites are abandoned by the Authority. The Authority is not yet ready to abandon the sites, as it may need the space for operational concerns (re-chlorination, flushing, etc.) related to water quality. The Authority would like to keep the sites for one year or more to monitor water quality.

d) Mr. Dickey announced that “Water and Wastewater Professionals Appreciation Day” is June 30, 2016 (if signed by the Governor). This is the first time that Water and Wastewater Professionals will be officially recognized by the Commonwealth of Virginia.

e) Mr. Dickey advised that Authority staff is going to schedule three Community Outreach meetings: Colchester Interceptor Phase II; Heritage Hunt Sewage Pump Station; and Willowbrook. Details will be shared with Board Members when the meetings are scheduled.

f) Mr. Dickey noted that he was recently appointed to Governor McAuliffe’s Nutrient Allocation Committee. (The Committee was established pursuant to the Governor’s Executive Order 52. The committee name has not yet been formalized.)

g) Mr. Dickey reminded Board Members of the special work session scheduled for next Wednesday, March 16 at 6:30 PM.

h) Mr. Dickey provided a brief presentation of the FY2017-2018 Budget. Handouts regarding the Budget Summary and Personnel Requests were provided to Board Members.
